

# CHROMATHERAPY KEYPAD

## A TRUE CHROMATHERAPY SYSTEM.

The industry offers different chromatherapy systems but all have the same purpose. Although enjoyable, it is impossible to thoroughly profit from the positive benefits that chromatherapy has to offer because it's always provided with only a "do it all" one touch and is not often very user friendly.

**CG Air Systèmes** found the answer and has come up with a way to obtain perfect harmony of color with four touches to truly enjoy all the benefits of mother nature's rainbow.

### BASIC COLORS

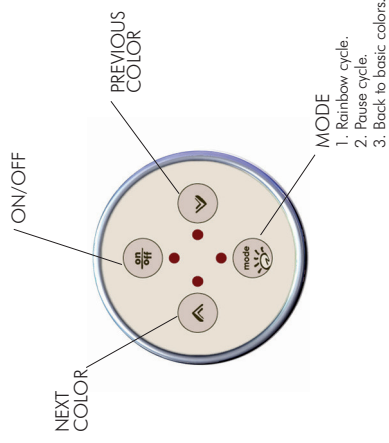

By choosing the basic color mode, the bather has access to all 7 basic colors by pressing the ▲ or ▼ buttons.

### RAINBOW CYCLE

The rainbow cycle goes through each basic color gradually. By pressing the ▲ or ▼ buttons, the bather can choose the speed of the cycle, and change it to fit the mood of the moment.

### PAUSE CYCLE

The pause cycle allows the bather to stop the rainbow cycle and to choose the exact color in which he wishes to bask in. By simply pressing the ▲ or ▼ buttons, the colors will vary gradually, going through the 7 basic colors and a multitude of tones in between.

### TIPS

As always, CG Air Systèmes offers the possibility of creating your own special identification with customized programming available upon request.
